PRO X PRESS

A Mercator Product

MODEL NUMBER: PX18E-U
Economy Manual Clamshell Dough Press

The PX18E-U Economy Manual Dough Press is perfect for low to medium production volumes (70-100/hr). This economical dough press is an easy, affordable way to improve your production time, as well as your finished product. This unit provides an upper heated platen with precise temperature and time control, which aids in dough flow and reduces “shrink-back”. The PX18E-U is capable of pressing dough balls to a finished size, eliminating the need for skilled, labor-intensive hand stretching. The heated upper platen allows you to press colder dough straight from your refrigeration unit.

- All metal housing with powder-coated white finish
- Digital controller with precise time and temperature
- Variable thickness adjustment
- Upper platen heated (up to 200˚F)
- Large opening clamshell design
- Flattens dough balls into pizzas up to 18” in diameter
- Aluminum upper and lower platens
- Sleek, modern, durable, easy-to-clean design
- Clamshell style to optimize counter space
- No flour needed
